CPA1 use of analysers	
EOGB commercial gas burner training	
Other	
Hot Water Systems & Safety (Unvented)	
Water Regulations	
Energy Efficiency	

## EOGB Training Application Form – Part 2

In order to determine the correct entry requirements, delegates requiring assessment are required to supply evidence to determine if they are Category 1 or Category 2 applicants.

### Category 1 applicants

If you are renewing an existing ACS or OFTEC qualification, you are considered to be a Category 1 applicant.

Training prior to undertaking assessment is not mandatory, however in most cases it is recommended to ensure that operatives are aware of the most recent changes to legislation, British Standards and industry best practice. It should be noted that attendance for training will not influence the independent impartial assessment which is carried out under the control of a recognised certification body.

Evidence of your existing ACS or OFTEC qualifications (**not** an OFTEC or Gas Safe membership certificate) is required for all Category 1 applications and **must** be provided prior to assessment.

Please tick here if you are a Category 1 applicant:

### Category 2 applicants

For OFTEC, you are considered to be a Category 2 applicant if one of the following applies to you:

- You already hold an OFTEC qualification and wish to add further categories
- You have recognised qualifications and experience in plumbing, heating and ventilation or gas

For Category 2 ACS applicants, please contact us for what is required.

Please tick here if you are a Category 2 applicant:

### Category 3 applicants

Candidates with little or no experience in oil will need to undertake the OFTEC 50 introduction to oil course prior to being considered for OFTEC assessment.

Please tick here if you are a Category 3 applicant:

## EOGB Training Application Form – Part 3
